

Northfield Construction Limited is a specialist subcontractor in the field of reinforced concrete frames and groundworks and has been trading since 2000.

The company recognises that its working activities may have a detrimental impact on the environment both now and in the future.

The following strategy will ensure that the impact on the environment will be prevented or limited to so far as is reasonably practicable, this will involve:

1. Compliance with all environmental legal requirements, regulations and guidance.
2. Planning work operations to minimise their potential impact on the environment.
3. Sourcing recycled and sustainable materials for work processes and choosing materials which can be recycled wherever possible.
4. Ensuring that all waste products are stored, transported and disposed of in a correct manner, in line with all current legislative requirements and with the duty of care concerning waste control.
5. Working to minimise the consumption of natural resources.
6. Ensuring that no materials or liquids shall enter and pollute any formation or water courses.
7. Endeavouring to work with customers and suppliers on minimising environmental impacts.

This policy, alongside all environmental documentation and process, is subject to continuous monitoring and review to ensure continued suitability to the work processes of Northfield Construction Limited.

Protecting the Environment not only makes good commercial sense but it is an investment in our future.
